

Hemp Processing Solutions

forestconcepts™

SOUND SCIENCE | DISCIPLINED DESIGN | FUNCTIONAL PRODUCTS

Size Reduction: the first step to preserving your harvest.

When reduced to small, uniform particles, hemp is ideally suited for handling, storing, and extracting.

Key benefits of our size-reduction processing:

- Handles any moisture content – including freshly harvested or frozen
- No heat added – preserving fragile plant terpenes
- Sized to your specifications

Drying: the second step in preserving your harvest.

We offer a variety of solutions to fit your harvest's unique scope.

- Customized temperature settings to match your crop's needs
- Dryer controls adjust based on outside conditions to ensure even temperature
- Faster, more even drying than traditional hang dry methods
- Drying without size reduction available

Putting it Together

From start to finish, our goal is to make it easy for you to do business with us.

Our team of skilled engineers can customize the hemp processing solutions that meet your project's unique needs.

What are the benefits of using our Hemp Processing Solutions?

- **Save Costs.** Our processing solutions means less capital investment on equipment.
- **Achieve Uniform Material.** Processed hemp is highly consistent in shape and flowable. These qualities make it ideal for handling, storage, and extraction.
- **Reduce Drying Time.** Our dryers cut down substantial time and labor over traditional methods.
- **Enjoy Custom Solutions.** As your partner, we'll design the solutions to meet your project's needs.
- **Expect Quick Turn-Around Times.** You can count on us for quick, efficient processing and responsive communication.
- **Access to Analytics.** We'll keep detailed records about your project and can provide you valuable analytics and history whenever you need it.
